*Prices, Profits and Dividends are restrained from October 14, 1975 by the Anti-Inflation Act.

In May of 1853 the first Grafton Store was opened in Dundas, Ontario, by James Beatty Grafton, about the time of the commencement of construction of the railways into southwestern Ontario. Six more stores were opened in the territory by 1910. By 1961 only three more stores were opened and the Company had sales of about \$3,000,000.

In 1912 the first Maher Shoe Store opened in Toronto under the name Reliance Shoe.

In 1926 the first Jack Fraser Store was opened in Toronto by Jack Fraser, and quickly established an image of providing superior value to the consumer. Management of the chain, which had been expanded into the Toronto suburbs after the War in the early community plazas, remained in the Fraser family until 1960.

In 1962 the first Woolco Store opened with Jack Fraser Stores appointed as licensee for the Boys' and Men's Wear department.

How did these enterprises come together?

The contemporary history of the Company commenced in November

of 1961 when G. R. Chater and W. A. Heaslip acquired the controlling interest in Grafton & Co. Limited from Stewart Philp, a Director of the present company. Shortly thereafter, G. A. Reynolds was recruited from the Company's present auditors to head up the financial and accounting side of the team.

In 1964 a group including four of the present Directors, Messrs. Gilbride, James, McCutcheon and Weldon purchased A. Bradshaw and Son (1882) Ltd., which included the Jack Fraser Stores.

The President of A. E. Ames, the late W. B. Macdonald, introduced the Bradshaw and Grafton parties, and ultimately they merged in 1967 to form Grafton-Fraser Limited. Combined assets were redirected into those areas that would be most productive, and unprofitable divisions were phased out. All of these redeployed financial assets were committed to the Woolco expansion program that was then moving into high gear. The new group was able to achieve a consolidated profit of \$187,000 in calendar year 1967, a turnaround from a loss in the previous year. The Company has been successful in increasing its earnings in each year since the merger.

Due to a large loss carry-forward in a discontinued drapery subsidiary of Bradshaw's, Grafton Group decided to enter the home furnishings industry through the purchase in 1969 of Toby Industries Limited, which had a long history of profitable operations. Similarly it was concluded that the Company was sufficiently profitable to embark on the gradual but accelerated expansion of the Jack Fraser Stores in 1970, after three years of consolidation, while continuing its participation in the growth of Woolco. The Company has continued to grow internally in parallel to the rapid expansion of Woolco, which has become Canada's largest department store chain in terms of square footage, and the growth of Jack Fraser to a national chain. Highlights of this expansion program are:

Calendar Year

- 1967 The formation of Grafton-Fraser Limited
- 1969 The acquisition of Toby Industries Limited
- 1971 The successful issue of common shares to the public at \$10.75 per share (which have since been split 3 for 2) and listings on the Toronto and Montreal Stock Exchanges

The first Grafton store opened May, 1853.

Fashions, circa 1910.

- 1971 The acquisition of Grafton Realty Company, Limited which completed the purchase of Head Office property at 9 Sunlight Park Road, Toronto, from Lever Bros. Limited in 1972
- 1973 Purchase of 33 $\frac{1}{3}$ % interest in Forsyth Trading Company Limited
- 1974 Acquisition of assets of James B. McGregor on behalf of Toby Industries Limited
- 1974 Purchase of 99% of the common shares of Maher Shoes Limited
- 1975 Sale of short term commercial paper to finance seasonal inventories
- 1977 Purchase of 50% interest in George Richards Kingsize Clothes Limited
- 1977 Sale of \$15 Million 20-year unsecured sinking fund debentures (the first public issue of long term debt securities)

The Future

Since 1967 the Company has expanded rapidly on a modest capital base, but always in a responsible manner to its lenders, banks, trade creditors and shareholders. It was able to do so by achieving a high return on its capital and by an ability to forecast accurately the future cash flows on which its leverage could be safely structured. We now have a solid rising earnings base and an adequate liquidity which provides the opportunity of expanding more rapidly than ever before.

We have a strong, experienced and dedicated management team, seasoned by successfully dealing with the most competitive marketing conditions known to contemporary Canadians since the Second World War. We have an ancient past, a proud tradition, a vigorous present and a promising future. In the beginning, the guiding merchandise philosophy of the Founders was fashion, quality, value and service. And so it continues.

Today fashions at Jack Fraser.

Last year we were surprised to win one of eleven Financial Post awards for our annual report, which was judged to be the best in the merchandising section. This year we have expanded our report further than has been our custom, due to celebrating our 125th year.

In the year most recently ended, your Company returned to a more traditional improvement in earnings after a disappointing performance the previous year due to our adjustment to the AIB regulations. Sales were up 9.5% to \$169,683,000 compared with \$154,958,000. Net income before the gain on sale of investments was up 24.2% to \$11,012,000, compared with \$8,869,000. This was equal to \$3.58 per share fully diluted, as compared with \$2.93, after giving effect to the 3 for 2 share split approved at the Annual Meeting held on April 28, 1977. The share split was recommended in an effort to increase the liquidity and marketability of the Company's shares on behalf of all shareholders, and appears to have worked satisfactorily.

We are particularly gratified to report that every subsidiary of the Company achieved all time record sales and earnings. As anticipated in this report a year ago, the first quarter started off poorly, but comparative results improved as the year unfolded and our last quarter gained momentum at Christmas time, producing outstanding results for that period and a satisfactory year.

Dividends were increased on June 15th to 18¢ per split share, and

December 15th to 19¢ per share, the maximum allowable under the AIB regulations until October 14, 1978. The Company made capital expenditures of \$2,782,000, and purchased a 50% interest in George Richards Kingsize Clothes Ltd. in April for \$2,808,000. In June we successfully marketed an issue of \$15,000,000 20-year unsecured sinking fund debentures. Our cash and near cash assets amounted to \$27,461,000 at year end and exceeded all outstanding long term debt. 98% of our shareholders' equity is represented by working capital and our working capital is very liquid. We are in a strong position to develop new initiatives, while nourishing and improving the growth of our existing activities.

The reasons for issuing the long term debt were: the Company's credit rating was revised upward, the investment climate was favourable, the future availability of funds in uncertain economic and political environments was unclear, and the Company felt any future acquisition or investment could best be dealt with from a strong cash balance sheet.

We are actively surveying possibilities in the United States and a number of our senior people are engaged in this project. We have found ourselves to be at a substantial disadvantage to competing American acquirers due to a number of reasons. Our Company is not well known there. Some owner-vendors require a three year payout to spread the cost of capital gains, and some American lawyers seem unfamiliar with the value of Canadian obligations and jurisdictions. Nevertheless our people have gained a great deal of experience and maturity in measuring the value and marketing approach of a number of diverse concerns. We are optimistic of success in participating eventually in this market.

As the AIB draws to a close, we view Federal and Provincial deficits as alarming, and the reduction in value of our currency and national wealth is the

dramatic result. The irresponsibility of governments in managing the affairs entrusted to them has resulted in many people and corporations regarding the United States as a more desirable home for future investments, and this is a great inhibitor to confidence and renewed growth in Canada, badly needed for the young people now entering the labour force.

We expect the economic and competitive environment in the forthcoming year to be similar to the one just passed, but due to greater productivity from our existing stores we expect an improved sales performance for our Company. This opinion is also based on the fact that consumers, according to our most recent three months' operating results, are more optimistic about their circumstances than the prevailing opinion of the business community.

This is the 125th year of the existence of the Grafton Group of companies, and while the expectations for the performance of the economy as a whole are deeply disappointing as compared with the capability of the Canadian people, the short term prospects for large specialized retailers is probably better than many alternative investments in this country at this time.

We acknowledge the loyal and continuing support of our employees, associates and suppliers who have contributed, through the years, to this remarkable record of survival and success over this 125-year timespan in Canadian history.

On behalf of the Board of Directors

G. R. Chater
President
March 21, 1978

The Company is concerned with the decline of public and investor esteem for business in general. This is due to many recent disclosures, more particularly in the United States but also in respect to some Canadian companies, including Crown Corporations. These disclosures involve unfunded liabilities, bribes, kick-backs, conflicts of interest and embezzlement. We are confident that all senior management of our Company have and will continue to conduct themselves in an ethical manner, but we also feel that the introduction of a formal code of ethical behaviour will serve the Company at this time.

Conflict of Interest

The Company is presently instituting a formal conflict of interest policy covering all areas of concern in respect to the conduct of directors, officers and senior employees.

FACTS RELATING TO UNDISCLOSED OR UNRECORDED LIABILITIES

Store Opening Expenses

All expenses relating to store openings are expensed in the year in which the store is opened.

Pensions

The Company has no liability in respect to past or current service benefits.

Capitalization of Leases

The capitalized asset value of all leases using actual commencement dates and terms is \$31,073,000 at the end of the year. This calculation has been made using a 10% interest factor. If the leases had been capitalized, this method of accounting would have the effect of recording depreciation and interest in lieu of minimum rental payments and would reduce the net income by approximately \$340,000 or 11¢ per share for the year.

Current Value Accounting

Based on current replacement costs and using our present depreciation rates, the estimated net book value of our leasehold improvements and fixtures is approximately \$700,000 in excess of the net book value recorded in the accounts. The extra charge to income, after tax, would be approximately \$30,000 or 1¢ per share. The value of the lands and buildings on a replacement cost basis owned by Grafton Realty Company, Limited and Maher Shoes Limited has not been taken into account in the calculations and no adjustment has been made for other assets or liabilities due to their current nature.

Foreign Exchange Exposure

In both of the retail companies, about 20% of all merchandise purchased is denominated in U.S. dollars.

In our manufacturing company, about 50% of purchases of raw material is denominated in U.S. dollars. It has been our practice during past years to hedge these purchases by the purchase of future U.S. dollars. At the present time, the Company is not hedged.

CORPORATE GOALS IN RESPECT TO EARNINGS AND DIVIDENDS

Earnings

The Company aspires to achieve an average annual compound growth of fully diluted earnings per share of 15% or greater in an environment of average inflation of 6% or less and a viable economic climate.

Dividends

The Company, which now has access to the long term debt market, believes a payout ratio of between 25% and 30% of the previous year's earnings on all classes of shares (if there were more than one class of share) is appropriate for the near term.

OWNERSHIP OF THE COMPANY

Greywinds Investments Limited, of which G. R. Chater, W. P. Gilbride, W. A. Heaslip and G. A. Reynolds are shareholders, together with J. W. McCutcheon and his associates, own 49% of the common shares of Grafton Group Limited.

T. E. Topping

President, Grafton-Fraser Limited.

Born in 1923, Mr. Topping joined the R.C.A.F. from high school where he became a pilot and served overseas. After demobilization in 1946, he joined A. Bradshaw and Son, Limited, also working when possible for Jack Fraser. In 1960, A. Bradshaw purchased Jack Fraser Stores Limited. Mr. Topping was appointed Vice-President and General Manager, Jack Fraser Stores Limited in 1963. After the merger of Grafton's and Jack Fraser Stores in 1967, he became a Director and Vice-President of Grafton-Fraser Limited and a Director of Grafton Group Limited. In 1971 he was elected President of Grafton-Fraser Limited, a position which he continues to hold.

Business of the Company

Grafton-Fraser is one of the three largest retailers of Men's and Boys' Wear in Canada. Our Jack Fraser Stores division commenced in 1926 with one store in Toronto and has been expanded into every province to consist of a total of 89 stores.

Our Woolco division commenced in 1962 with one store in Windsor, Ontario, and has been expanded across the country to consist of a total of 93 outlets.

In 1977 Canadian retailers experienced continued difficulties, partly due to adjusting to changing AIB guidelines. Competition was keen and sales increases were achieved mainly at the cost of reduced margins and special promotions. For the second year in a row increased productivity per square foot in terms of unit sales was greater than the corresponding increase in dollar sales per square foot. The consumer has benefitted greatly from this intense competition.

Favourable and better planning resulted in little or no carryover of Summer or Winter merchandise.

Because our merchandisers achieved a better balance in their inventory mix than in the previous year, we were able to capitalize on the December surge in sales. Increased volume during the heavy traffic months resulted in lower inventories and reduced markdowns. The success of the merchandisers was equalled by the operations team in controlling expenses despite the extensive increases confronting them from all sources.

Restriction of imports is interfering with long established delivery patterns. As a result the consumer pays more on items that in many cases could not be and are not made in Canada. Closer liaison between the regulating bureaucrats and the distributors and merchandisers is a vital requirement in the public interest.

Regional shopping centre locations are becoming more scarce and future internal growth will be somewhat less rapid than during the past ten years. We, fortunately, have several provinces and many growth areas still available to us. The Woolco expansion will now include medium-sized cities, smaller stores and lower square footage in

various departments. The experience we have gained in operating departments in four converted Woolworth Stores will be beneficial in the future.

While reasonable growth for Jack Fraser is possible from new shopping centre developments, one of the major trends in the shopping centre industry is the modernization and renovation of existing centres. Generally speaking such programs allow for the expansion of specialty tenants such as Jack Fraser. These opportunities arise for a number of reasons. Leases of independents mature in centres in areas of Canada in which Jack Fraser did not operate previously, and Jack Fraser is a desirable addition to the developers who are national and know us well. Other independents fail or just retire from business. In some cases it is the expansion of the shopping centre that creates the opportunity. Today, 67% of Jack Fraser sales are coming from Ontario and if we achieve balanced sales across the country in, say, eight years, we will have doubled the number of our locations.

Last year in this report we made a commitment to increase inventory turnover, and this was in fact achieved. We have expanded our Buying and Supervisory staff and thus improved the flow of sales and stock information. This, in turn, is giving us better inventory control, faster turnover of stock and reducing stock-outs dramatically. Procuring personnel to support our expansion program is a never ending challenge. We know that reliable well-trained staff will increase sales, but despite the high rate of current unemployment, it is possible that young people, better educated than ever before, may have been led to believe by the educators that they could enter the work force at a higher level than what the practicalities of business will permit.

Grafton-Fraser's lengthy success has been based on these cornerstones of retailing—Fashion, Quality, Good Value and Service, and we are extremely optimistic that 1978 will produce another significant year of growth in both sales volume and increased earnings.

Co-ordinated Casuals in the Woolco Mens Wear Department.

A. L. Lucas, Senior Vice President

Born in 1935, Mr. Lucas commenced working for the company after school at the age of 12. He joined the Company on a full-time basis in 1952 and worked as a clothing salesman and store manager until 1965 when he was appointed Supervisor and Display Manager of Jack Fraser Stores. In 1967, he became Assistant General Manager-Stores.

In 1971, he transferred to the Leased Department Division as Vice President with overall responsibility for the operation of the Woolco Men's & Boys' Wear Departments. In 1975, he was promoted to Senior Vice President-Leased Departments, the position he now holds.

Business of the Division

Grafton-Fraser operates a leased department in every Woolco Store in Canada and Woolco is the largest Department Store Chain in Canada in terms of retail square footage. Grafton-Fraser occupies between 9 and 10% of the selling footage for the sale of men's and boys' wear. Departments range from 3,000 to 13,500 square feet and average 8,400 square feet.

This is the largest division of the Company in terms of gross revenues and financial commitment. Sales in 1968 were \$10,085,000 or 47% of our total volume and now are \$86,460,000 or 51% of the total.

Ninety-three Woolco Stores were in operation as of the year end. The 1977 Woolco expansion program included the conversion of four Woolworth Stores to Woolco Stores and these conversions have proven successful for Grafton-Fraser.

Five new Woolco Stores and the conversion of two Woolworth Stores are planned to open in 1978. Steady growth of Woolco sales is assured due to their present broad exposure in strategically located suburban trading areas, coast to coast.

Based upon the questions asked by financial analysts, the most difficult aspect of our business for them to understand is the relationship with Woolco. We believe that the two companies enjoy a classic business relationship involving mutual benefits. On January 10, 1978, F. W. Woolworth Co. Limited completed the sale of sinking fund debentures which was preceded by the issue of a public prospectus. Certain information that was private is now a matter of public record. We quote from the Woolworth prospectus: "When the Company started the Woolco Division it was decided that certain departments within the stores would be operated by licensees in order to gain the benefit of merchandising expertise not otherwise available within the company. Accordingly the Company entered into license arrangements with a number of specialized merchandisers. These departments accounted for 21% of the sales area and 29% of the aggregate sales of the Woolco division in the year-ended January 31, 1977."

As a licensee, we pay rent to Woolco

based on sales and space occupied. As our sales per square foot have increased over the years, the rent paid has increased proportionately. The rentals, as a percentage of sales, are high as related to normal rentals of the retailing industry and, therefore, require us to place great emphasis on efficiency. From the Woolworth prospectus it can be ascertained that Grafton is paying in excess of 50% of the rentals received by the Woolworth company from all sources.

Woolco was one of the first discount stores in 1962 and although a host of others entered the field, very few have survived. Woolco has prospered because of their able Canadian management team who have produced results which are superior to those of the other divisions of its American parent. Woolco forged ahead because it has successfully evolved into a full line department store while retaining the better aspects of its value image. Woolco has an exciting future in Canadian retailing and we look forward with pride in continued participation in their success based on past performance levels.

Sales increased less than 4% in the first half of 1977, followed by a 10.8% third quarter increase and a 12.4% improvement in the high volume fourth quarter for an 8.4% full year sales increase. This sales increase was modest in comparison to many recent years. However, profits increased satisfactorily in ratio to the sales increase due primarily to keen expense control and minimization of lost sales in the areas of basic and proven best selling merchandise.

The Grafton-Fraser merchandise assortment for Men and Boys, in Woolco, is directed to the needs of the average suburban shopper, providing large and complete selections of basic apparel at popular and competitive prices. Fashionable casual wear and active sportswear sales are increasing rapidly, in line with the steadily growing participation of the Canadian male in leisure lifestyle activities.

Regular world-wide monitoring of fashion trends, establishment of an internal Quality Control Department and ever-increasing buying power assure Woolco customers of current fashion interpretations in Men's and Boys' Wear, guaranteed as to quality and value.

J. B. Coutts, Senior Vice President

Born in 1924, Mr. Coutts served in the R.C.N.V.R. from 1943 to 1945. On his return to business life, he became a store manager with Maher Shoes Limited. During the years 1946-1966, he held the positions of Supervisor, Buyer and Vice President and in 1967 was appointed President and Director of Maher Shoes Limited, offices he held for four years.

In 1971, he joined the Grafton group of companies and was appointed Vice President-Stores for the Jack Fraser Division. He was promoted in 1974 to the office of Senior Vice President-Stores, a position he continues to hold.

Business of the Division

Jack Fraser operates 89 stores in all the Provinces of Canada. These stores sell men's apparel including suits, furnishings and sportswear aimed to appeal to style and value conscious men. 70% of the stores have a Loft Department consisting of 20% of the square footage of the store, carrying junior ladies sportswear of medium price aimed at the fashion conscious young lady. 10% of the stores have a separate "Jacks" shop, selling jeans, tops and bottoms and other separates.

Typical store sizes range from 4,000 to 5,000 square feet.

The Stores Division enjoyed its 11th consecutive year of both increased sales and earnings. Sales in the latter half of the year were strong and confirmed the growing consumer awareness of our value and service.

Sales increased 11% in the first half of 1977 followed by a 15% increase in the fourth quarter which, of course, includes Christmas. During the year, 4 stores were closed and 13 new stores opened.

We are operating this Division with long term plans of accelerated growth, and our past year's performance reaffirms our confidence in the directions we have planned. Our substantial

investment in both store upgrading and system controls has been well justified and will be further reflected in future years' profits when our present program is completed. Fashion is the most important aspect of our business, and a clearly defined goal of our market position has been extremely helpful in attaining our objectives.

We continue to emphasize a strong Quality image with our customers. Our objective is acknowledged to be a constant and continuing program of close alliance with our suppliers and staff to maintain strict quality controls. Value is the cornerstone on which our business is built, and our ability to offer consistent value is clearly reflected in our past years' sales.

It is our responsibility to oversee the diverse operation of the stores, the Loft departments and now the Company's interest in the George Richards King-size Stores through mutual cooperation and agreed standards. Within the last few years, we have achieved a rate of return on sales which we believe would be amongst the most respected in our industry in North America.

In summary, we expect that the coming year will show continued growth in the quality of our earnings through the dedicated efforts of all those involved in our Division.

From this season's sport shirt selection.

T. P. Wilson, President

Born in 1932, Mr. Wilson started his career with Maher as a part-time, after school sales clerk at the age of 14. In 1950, Mr. Wilson joined Maher on a full time basis and progressed through various managerial assignments until 1960 when he joined the head office team as a supervisor. He was elected a Director of Maher in 1962, appointed Vice President in 1967 and promoted to President in 1971, a position which he still retains.

Business of the Company

Maher operates 176 retail stores across the country. Its divisions consist of Maher, Bonita, Shoeman, Copp, J. Reid and leased departments. The various divisions cater to different types of customers and cover the medium and higher priced shoe range.

We are pleased to report that the Company's consolidated sales and profits in 1977 were the highest on record, as all retail divisions have shown increased sales and profits from last year.

While the retail market conditions throughout Canada during the year have tested the management strength of the Company, after a soft Spring, we enjoyed a record Fall and Winter selling season with a fourth quarter sales increase of 23.3%, and much of this impetus has continued into the current year. Along with this, continued improvement and efficiencies from a consolidation of the operating and merchandising functions has been achieved. This has been accomplished at a time when a number of small to

medium sized competitors have ceased operations.

During the year, 15 new stores were added and 15 stores were closed, while 20 small adjacent divisional shopping centre stores were combined, ending the year with 176 total units in operation.

Although the footwear industry will be further challenged with short term supply vibrations, created from the government imposed import quotas, we remain optimistic and confident that our Company is soundly positioned to maximize its continued planned growth, due in part to long standing Canadian supplier relationships.

Our financial position has improved dramatically over the last few years, and the reduction of our financial expenses as a proportion of total expense has been one of the factors in our improving results. We are confident the current year will accomplish a new record in our earnings, given reasonably stable economic conditions.

Homefurnishings Division

T. R. Young, President

Born in 1920, Mr. Young joined Toby in 1939, starting in the shipping department. He worked in various other departments of the Company during the next 16 years and in 1955 was appointed General Manager. In 1960, he was elected President of Toby. After the acquisition of Toby by Grafton Group in 1969, Mr. Young became a Director of Grafton Group and continued on as President of Toby, a position which he still retains.

Business of the Company

The company is comprised of two divisions in separate plants in Toronto. The Toby Division manufactures bedspreads, comforters, cushions and other related home furnishing items, while the McGregor Division manufactures and imports shower curtains and a complete line of bathroom accessories. Our customers are the major department stores and chains as well as specialty stores across the country.

The past year has been most rewarding in the market acceptance of the new styles produced by Toby and James B. McGregor divisions. The response to the new Toby comforter line was very encouraging and was the major reason for the 10% increase in sales during a very difficult period.

The McGregor division experienced fairly grave difficulties in the last half of fiscal 1976 and the first half of 1977. These were due to a management reorganization at the time of installa-

tion of a complex computer program. However, the problems were overcome and the division returned to profitability in August of last year and has continued to perform well subsequently.

Contract negotiations for both divisions with the Amalgamated Clothing and Textile Workers Union will be instituted in 1978 and a continuation of the excellent relationship between the Union and the company are anticipated. While this is the only company in the group that is unionized and has been for some time, we have as yet never had a strike.

Our objective in 1978 is for increased penetration of the market for the new styles and fashions that have been developed while increasing the profitability of the company through tight budgetary restraints.

G. A. Reynolds, *Vice President, Finance*

BALANCE SHEET

Assets

Cash

Bank deposit receipts amount to \$23,500,000 and the remaining balance in this account was mainly represented by cash in transit from stores.

Marketable Securities

The Company has made investments in shares of 4 listed public companies. Three of the investments are in preference shares with an after tax yield to the Company of approximately 78%. Since the year end, investments in 7 other listed companies at an approximate cost of \$3,000,000 have been made in high quality, high yielding securities. The balance of the cash is being used internally to finance seasonal inventory increases and is invested in short term interest bearing securities. It is the Company's intention to maintain a relatively high liquid position while endeavouring to locate suitable long term investments or acquisitions.

Accounts Receivable

Trade accounts receivable of the manufacturing division, after provision for doubtful accounts, and amounts due for sales under licensee arrangements comprised most of this account. There were no advances or loans to officers or directors.

Inventories

Inventories rose by 4.9% compared with the sales increase of 9.5% and, as a result, the number of turns improved to 5.9 from 5.6.

Investments

Over the past 4 years the Company has made 3 investments in companies which are being carried in the accounts as equity investments. The total original investment in the companies was \$4,059,000. The equity earnings to date from these investments are \$2,139,000 and the book value as at January 31, 1978 was \$5,865,000.

Forsyth Trading Company

Limited – 33⅓% owned

Forsyth is a manufacturer of fine quality shirts, ties and pyjamas under the well known Forsyth and Pierre Cardin labels. Consumer acceptance of the high fashion, superior Pierre Cardin garments has been outstanding. In addition, good quality sweaters and knit shirts have been imported from better manufacturers in various parts of the world. A wholly owned subsidiary, Mylord Shirt, imports and manufactures a variety of men's furnishing items under the Fruit of the Loom and private brand labels. Sales for the Forsyth group of companies increased by 31% in 1974, 10% in 1975, 27% in 1976 and 31% in 1977. Of the original investment of \$1,000,000 in preference shares made in late 1973, ⅓ were redeemed during the current year and it is Forsyth's intention to redeem the balance over the next two years.

George Richards Kingsize

Clothes Limited – 50% owned

George Richards operates 12 men's clothing stores special-

izing in large size garments. Eleven of the stores are located in Ontario and one is in St. John's, Newfoundland where a large mail order business indicated a need for a specialty store of the Richards type. It is Richards' intention to expand into a national chain of specialty shops as expediently as possible. Suitable locations should become more readily available with the combined leasing strength of Grafton Group. Sales for 1977 increased by 23.8% over 1976.

Barclay-Lanes Shoes – 50% owned

Barclay-Lanes is a chain of eleven shoe stores located in regional shopping malls in Southern Ontario. The chain has been developed in conjunction with Savage Shoes (1970) Limited, a leading Canadian shoe manufacturer, and retails high fashion, branded lines of ladies' and men's footwear. Sales in 1977 for stores open at the beginning and end of the year rose by 10%.

Net asset value	<u>\$4,096,000</u>	<u>36.4</u>	<u>\$2,613,000</u>	<u>32.8</u>

BALANCE SHEET REVIEW (Continued)

Fixed Assets

The increase in fixed assets was mainly attributable to the opening of 28 stores and the refurbishing of several older units. After depreciation, the net cash outlay amounted to \$1,054,000.

Liabilities

Accounts Payable

The increase resulted largely from receipt of merchandise later in the year and accruals for such items as percentage rent and commissions which were higher due to the level of sales through December.

Income and Other Taxes Payable

Instalment payments, as required by the Government, were increased through the year which resulted in a lower balance.

Long Term Debt

The increase in long term debt from \$9,395,000 to \$21,017,000 is due to the following:

Long term debt at beginning of year	—	\$ 9,395,000
Debt issued	—	15,000,000
		<u>24,395,000</u>
Debt prepaid	—	3,378,000
		<u>\$21,017,000</u>

Shareholders' Equity

Capital Stock

During the year 28,125 shares were issued under an Employee Stock Option Plan (which has expired) and 780 shares under terms of the 7¼% convertible debenture for an increase in the outstanding capital stock of 28,905 shares represented by \$420,000.

Retained Earnings

The contributed surplus, because of its small amount, was reclassified as retained earnings during the year. The increase in retained earnings without the above-noted transfer was \$9,332,000 or 35%.

STATEMENT OF INCOME

Cost of sales and expenses other than undernoted decreased from 78.5% to 77.8% while rental and license expense increased to 8.6% from 8.5% of sales. This resulted in an increase in the income from operations percentage to 13.5% from 12.9%.

Income from investments increased by 578% which was mainly attributable to the outstanding year of Forsyth Trading Company Limited.

Depreciation increased by \$208,000 for the year as a result of our investment in new stores and other equipment. Total interest declined marginally.

As a result of these factors, the pre-tax income increased by 18.6% and was 11.9% of sales in 1978 compared with 11.0% in 1977. The effective tax rate declined by 2.3% to 45.1% from 47.4%. Without the inventory tax credit, the effective tax rate would have been 47.0%. The dividends paid during the year amounted to \$1,926,000, an increase of 43.1% in dollars over those paid in the preceding year. As a percentage of income before extraordinary item, the dividends amounted to 17.5% compared with 15.2% for the preceding year.

SUBSIDIARIES

Grafton-Fraser Limited—
100% owned

Sales for the year increased to \$122,916,000 from \$111,939,000 or 9.8%. Net income for the year amounts to \$8,497,000 up from \$7,029,000, an increase of 20.9%. Of the increase, \$245,000 or 3.5% is attributable to the inventory tax credit. Inventories were \$17,619,000 as compared to \$16,909,000 last year and inventory turns improved to 70 from 6.6 turns.

Maher Shoes Limited—99.9% of common shares owned, 60¢ preference shares, 100.0% owned by the public and they are listed on The Toronto Stock Exchange.

Sales for the year were \$34,165,000, an increase of 8.3% from \$31,553,000 for the previous year. Since being acquired in 1974, sales have risen to the current figure, \$34,165,000 from \$27,440,000, an annualized increase of 7%. It should be noted that Maher has closed or combined 90 stores during this period which has had an adverse effect on sales growth and a short term dampening on profits. Net income for the year, after preference dividends, was \$949,000, an increase of 43.1% from \$663,000. Of this increase, \$105,000 or 15.8% was due to the inventory tax credit. Inventory at the year end amounted to \$7,725,000, \$7,468,000 last year, and turns increased to 4.4 from 4.2.

Toby Industries Limited—
100% owned

Sales for 1977 rose to \$12,602,000 from \$11,496,000 or 9.6%. Since the acquisition in 1969 sales have climbed to the present \$12,602,000 from \$4,115,000 for an annualized increase of 15%. The acquisition of James B. McGregor division has accounted for a substantial portion of the sales increase. Net income for the current year was \$398,000 up by 81.7% from \$219,000. The inventory tax credit was \$41,000, representing 18.7% of the increase. Inventory was \$3,585,000 compared to \$3,208,000. Inventory turns for the respective years were 3.5 and 3.6.

Grafton Realty Company, Limited—
100% owned

Grafton Realty Company, Limited has gross assets of \$3,535,000 which are comprised of 9 acres of land in east central Toronto, where the corporate head offices and Toby manufacturing facilities as well as a modern office building and warehouse leased to Lever Brothers Limited are located, and various downtown locations in 5 southern Ontario communities. There are no encumbrances on any of the properties. Gross rentals, including rent to related companies, was \$826,000 this year and \$801,000 last year. The company's income contribution is nominal.

Grafton Group Limited
Year ended January 31, 1978

1. SUMMARY OF ACCOUNTING POLICIES

(a) Principles of Consolidation

The consolidated financial statements include the accounts of all subsidiary companies since dates of acquisition. The major operating subsidiaries are as follows:

	<u>Fiscal Year of Acquisition</u>	<u>Fiscal Year End</u>
Grafton-Fraser Limited	1968	January 4, 1978
Toby Industries Limited	1970	December 31, 1977
Grafton Realty Company, Limited	1972	December 31, 1977
Maher Shoes Limited	1975	January 7, 1978

(b) Investments

The consolidated financial statements include, on an equity accounting basis, all the companies in which the company has significant influence or effective control. The operating companies accounted for on this basis are as follows:

	<u>Fiscal Year of Acquisition</u>	<u>Fiscal Year End</u>
Forsyth Trading Company Limited	1974	December 31, 1977
Barclay-Lanes Shoes	1976	January 7, 1978
George Richards Kingsize Clothes Limited	1978	December 31, 1977

(c) Inventories

The inventories are valued on the following basis:

Retail inventory—lower of cost and net realizable value less normal profit margin.

Manufacturing inventory

Raw materials—lower of cost and replacement cost.

Work in process and finished goods—lower of cost and net realizable value.

(d) Fixed Assets

Depreciation is provided as follows:

Buildings	5% diminishing balance
Equipment and fixtures	20% diminishing balance and 10% straight-line
Leaseholds	term of lease, straight-line

(e) Goodwill

Goodwill, the excess of cost over underlying book value of Maher Shoes Limited, acquired during the 1975 fiscal year, is being amortized in accordance with the requirements of the Canadian Institute of Chartered Accountants on a straight-line basis over forty years from the date of acquisition. Accumulated amortization to January 31, 1978 is \$497,000.

(f) Income Taxes

The company charges earnings with income taxes currently payable and also with income taxes deferred by claiming certain costs for income tax purposes in excess of related costs charged to income. The accumulated total of such income tax deferments is reflected in the consolidated balance sheet as "Deferred income taxes".

(g) Financing Costs

Costs of issued long term debt are deferred in the year incurred and amortized against income over the term of the applicable issue.

(h) Pension Costs

Current service pension costs are charged to operations annually.

2. INVENTORIES

	1978	1977

Listed marketable securities less sold or reclassified as current assets in 1978, at cost less provision for decline in value (market value 1978, \$448,000; 1977, \$1,872,000)	220,000	989,000
	<u>\$ 6,167,000</u>	<u>\$ 3,724,000</u>

On April 28, 1977 a subsidiary company, Grafton-Fraser Limited, purchased a 50% interest in George Richards Kingsize Clothes Limited at a cost of \$2,808,000. George Richards Kingsize Clothes Limited is a retailer of specialty men's clothing with locations principally in Ontario. The investment is being accounted for on the equity method with the goodwill acquired of \$1,911,000 being amortized to equity income over ten years on a straight-line basis. The purchase agreement contains an option whereby Grafton-Fraser Limited may purchase or may be required to purchase the remaining 50% of the shares of George Richards Kingsize Clothes Limited at a price to be determined by an agreed upon formula. This option is exerciseable five years after the date of the original purchase.

4. LONG TERM DEBT

	1978	1977
(a) 7¼% Convertible debentures, maturing June 30, 1979	\$ 5,017,000	\$ 5,036,000
(b) 10½% Sinking fund debentures, Series A, maturing June 1, 1997	15,000,000	
(c) 6¾% Sinking fund debentures, Series A, maturing April 1, 1987	1,000,000	1,100,000
(d) Term bank loan, bearing interest at the prime banking rate plus 1%, maturing September 1, 1979		3,000,000
(e) Term bank loan, bearing interest at the prime banking rate plus 1¾% (not less than 9% per annum), maturing May 1, 1982		1,411,000
	21,017,000	10,547,000
Less principal due within one year		1,152,000
	<u>\$21,017,000</u>	<u>\$ 9,395,000</u>

- (a) The 7¼% convertible debentures of Grafton Group Limited have been issued in individual units of \$50. The debentures are convertible at the holder's option into common shares of Grafton Group Limited at a conversion price of \$20 per common share, and cash or scrip certificates for the balance.

The debentures may be redeemed by the company prior to June 30, 1979 if the weighted average trading price per common share, on a stock exchange, of Grafton Group is \$24 or greater for each of 20 successive trading days, at which time the company may call the debentures for redemption on thirty days notice.

The debentures are secured by a first fixed and specific pledge on notes payable by Grafton-Fraser Limited to the company (\$5,181,000 at January 31, 1978). These notes are secured by the pledge of 109,200 common shares of Maher Shoes Limited.

- (b) During the year the company issued \$15,000,000 10½% redeemable sinking fund debentures, Series A. Of the net proceeds received of approximately \$14,603,000, \$4,347,000 were used to prepay the term bank loans of Grafton-Fraser Limited and Grafton Realty Company, Limited. The remainder was utilized for investment and working capital purposes.

The 10½% sinking fund debentures, Series A, mature on June 1, 1997 and require sinking fund payments sufficient to retire \$900,000 principal amount of the Series A debentures on June 1 in each of the years 1982 to 1996 inclusive. The company has the right, when not in default, to redeem in whole or in part the issued and outstanding Series A debentures under conditions as set out in the Trust Indenture. The company is restricted from paying cash dividends on shares if such payment exceeds consolidated net income earned after January 31, 1977 plus \$7,000,000. As well, the Trust Indenture contains certain asset and earning tests which govern the issuance of additional funded obligations.

- (c) The debentures of Maher Shoes Limited are secured by a first floating charge on the assets of Maher Shoes Limited. The more significant of the covenants of the trust deed restrict Maher Shoes Limited from reducing its consolidated working capital below \$1,000,000 and from paying dividends on common shares if such payments would reduce consolidated working capital (which was \$5,065,000 at January 7, 1978) below \$1,250,000. At January 7, 1978, the company had a sinking fund credit sufficient to meet all of the \$85,000 payment due in 1979 and the payments required in 1979 and future years average approximately \$110,000 per annum to 1987, the date of maturity.

Principal repayments within the next five fiscal years on all long term debt of Grafton Group Limited and subsidiary companies are approximately:

	January 31, 1978	January 31, 1977
1978	Nil	\$ 1,152,000
1979	Nil	1,231,000
1980	\$ 5,069,000	6,315,000
1981	96,000	307,000
1982	101,000	337,000
1983	1,008,000	
	<u>6,274,000</u>	<u>9,342,000</u>
due beyond five years	<u>14,743,000</u>	<u>1,205,000</u>
	<u>\$21,017,000</u>	<u>\$10,547,000</u>

5. CAPITAL STOCK

	1978	1977
Common shares		
Issued		
Issued during the year under the Employee Stock Option Plan, 28,125 shares (1977, 3,525 shares) at \$14.40	\$405,000	\$51,000
Issued under the terms of the 7¼% convertible debentures, 780 shares (1977, 1,809 shares)	<u>15,000</u>	<u>36,000</u>
	<u>\$420,000</u>	<u>\$87,000</u>

On April 28, 1977 a resolution was approved by shareholders to amend the company's Articles of Incorporation to subdivide the issued and unissued common shares without par value on a 3 for 2 basis. As a result of this amendment, the conversion price attached to the 7¼% convertible debentures has been adjusted to \$20 per common share. The 1977 comparative figures have been restated to reflect this subdivision.

In addition, 250,851 common shares have been set aside for conversion privileges attached to the 7¼% convertible debentures outstanding at January 31, 1978.

6. EARNINGS PER SHARE

Earnings per share are based upon the weighted average number of shares outstanding during the year after giving effect to the 3 for 2 subdivision (2,874,354 shares in 1978 and 2,843,128 shares in 1977).

Fully diluted earnings per share illustrates the effect on earnings of the conversion of the outstanding 7¼% convertible debentures.

7. LONG TERM LEASES

Based upon all leases including licenses in existence as at their fiscal period ends, the aggregate minimum amount that will be incurred by all the company's subsidiaries as annual rental or license expense during their next five fiscal years is approximately \$7,949,000.

8. CONTINGENT LIABILITIES

With respect to the investment in shares of Forsyth Trading Company Limited (note 3), Grafton Group Limited has guaranteed 50% of certain notes payable by Forsyth. Grafton Group Limited's contingent liability at January 1, 1978 amounted to \$416,000 (1977, \$584,000) and totally expires in August, 1980 when the above notes mature.

9. INCOME TAXES

The effective tax rate on income before income taxes was 45.1% (1977, 47.4%). This includes an inventory allowance tax deduction for income tax purposes of approximately \$391,000 in 1978.

10. ANTI-INFLATION LEGISLATION

The company and its subsidiaries are subject to the Anti-Inflation Act which provides for the restraint of profit margins, prices, dividends and compensation. In management's opinion, the company and its subsidiaries have complied with the provisions of this Act for the year ended January 31, 1978.

11. OTHER STATUTORY INFORMATION

Remuneration of directors and the senior officers of the company and its subsidiaries (as defined by The Business Corporations Act) was \$639,000 (1977, \$612,000).

Auditors' Report

To the Shareholders of
Grafton Group Limited

We have examined the consolidated balance sheet of Grafton Group Limited as at January 31, 1978 and the consolidated statements of income, retained earnings and changes in financial position for the year then ended. Our examination was made in accordance with generally accepted auditing standards, and accordingly included such tests and other procedures as we considered necessary in the circumstances.

In our opinion, these consolidated financial statements present fairly the financial position of the company as at January 31, 1978 and the results of its operations and the changes in its financial position for the year then ended in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

A specific list of store locations is available on request.

1. Sales—The sales graph, by divisions, shows that one year, 5 year and 10 year compound growth rates are 9%, 23% and 23%.

2. Operating, Pre-Income Tax and Net Income—The one year, 5 year and 10 year compound increase in net income are 24%, 28% and 58% respectively.

3. Capitalization—The graph illustrates that the major source of company funds is being generated by rapidly increasing Shareholders' Equity and that long term debt has increased to a lesser extent over the past five years.

4. Dividends and Earnings Per Share—The graph indicates that the dividends paid per share are at a very modest level and are being inhibited by the present Anti-Inflation Act from rising to the Company's pre A.I.B. level.
